

Modi's Dairy

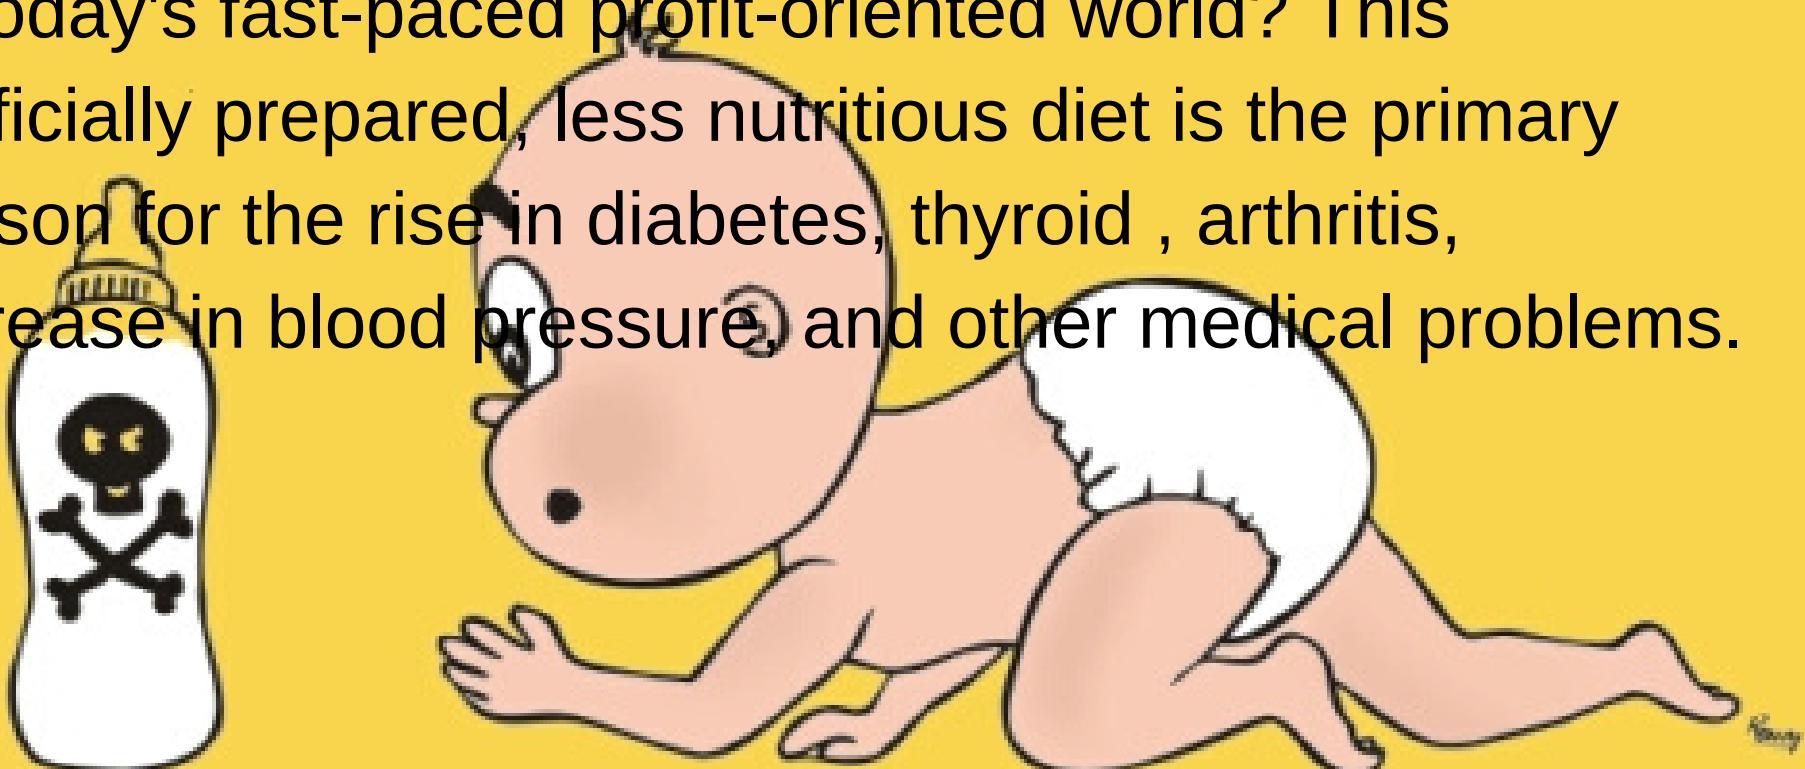

Complete food for the whole family

Here at Modi's, we pride ourselves in providing pure A2 milk, and milk products

We are all aware that our ancestors used to use desi cow milk to utilize milk, curd, ghee, buttermilk, and butter. This was the secret behind their strength, and health. Desi cow gives A2 milk is precisely why we say that our grandfathers, and great-grandfathers have consumed rich, and ultra-nutritious ghee.

What luck do we have in consuming such rich products in today's fast-paced profit-oriented world? This artificially prepared, less nutritious diet is the primary reason for the rise in diabetes, thyroid , arthritis, increase in blood pressure, and other medical problems.

So let's be closer to nature, and use it's natural treasure to get the best food for our health, and our mind.

**Every time you eat or drink,
you are either feeding disease or fighting it.
Make the right choice to eat.**

Why use milk?

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

1. Gir cow A2 milk, and Buffalo milk

Start off your day with pure and fresh Gir cow milk made right at our farm. Milking of cows is done in traditional, safe way using hands

What is A2 milk, and why should I buy it?

Milk has tons of protein in the form of Beta-casein. There are 2 types of casein: A1 and A2. A2 protein is extremely beneficial for our health, and it is found in Indian cows like Gir, Sahiwal, and Kankreji.

Gir cow has khundha or hump unlike the western cows. Our scriptures (shastras) say that animals with a hump have a solar naadi. Because of the solar naadi, the Indian cow has the ability to absorb beneficial solar rays, the benefits of which are passed on to cow milk, urine, and cow dung. Because of this, the milk produced in the body of Gir cow gets a protective cover around itself, which in turn helps ward off several diseases in the human body.

Indian cow milk even helps in reducing Medasvita. It boosts the memory power and improves concentration in growing kids.

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

2.A2 Ghee

Use our light, golden, and rich Gir cow ghee for cooking, and preparing sweets! We prepare this nutrititious ghee from A2 milk .

By churning curd using traditional churning method using Ghammar Valonu, and then separating butter and buttermilk, the ghee made at the end process has an amazing charm to itself.

Benefits of A2 ghee:

- 1)Rich source of Omega-3 and vitamins, minerals, protein, iron and calcium
- 2) Gives glowing skin, is anti-ageing and cures hair fall
- 3) Treats wounds and burns
- 4)Best healthy fat source due to lack of trans fat, and adulteration
- 5)Boosts Immunity
- 6)Aids in weight loss and controls obesity
- 7)Helps in muscle and tendon functioning

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

3. Bilona churned butter

Have a healthy, and tasty breakfast using our light, creamy, pure Gir cow milk bilona churned butter. We sell three flavors of butter to suit your personal tastes:

- 1)Plain Butter
- 2)Garlic herb butter
- 3)Orange Cinnamon butter

This butter acts as a healthy, and tasty alternative to the junk food that kids often like to eat. Serve your kids buttery breakfast toast made from Modi's dairy!

Why should I buy desi makkhan instead of butter?

The main difference between white colored maakhan and yellow colored butter is the process of making. White butter is natural, unprocessed and thus healthier option to consume. White butter does not have trans-fats which are considered unhealthy. On the other hand, yellow colored butter has trans-fats, and adulteration that make it an unhealthier option to consume.

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

4. Homemade Paneer

Enjoy our delicious, soft homemade paneer made with A2 milk - a rich source of protein, and calcium.

We offer 2 varieties of paneer:

- 1)Plain paneer
- 2)Herbed paneer

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

5. Homemade Mozzarella cheese

Get the same stringy, cheesy feel of commercial mozzarella cheese with lower calories, and the nutritious richness of A2 protein, and no adulteration.

Enjoy luxuriously light, and tasty pizzas, pastas, mozzarella sticks, jalapeno poppers.. the list is endless.

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

6. Homemade Buttermilk

Our A2 buttermilk will satisfy you with its cooling freshness on a hot day of tiring work. What's more? It also helps in digestion, and other gastrointestinal problems like gas, acidity etc.

Our products

We provide a variety of products to 100% satisfy your daily dietary needs

7. Manure, Gaumutra, and dung cakes

Do you wish to be self-sufficient, and grow your own vegetables? Or does your garden look dull, and lifeless? Well, use Modi's manure, gaumutra, and dung cakes to grow beautiful, healthy plants without the use of pesticides, and chemical fertilizers.

Fresh cauliflower and spinach grown at our farm using Modi's manure

Biogas Energy Production at Modi's Dairy Farm

- Sustainable Agriculture: Digested Biogas Slurry (DBGS) used to fertilize soil with essential micro and macro nutrients
- Sustainable Energy: Biogas energy generated from dung used for cooking, operating fans and lighting on the farm
